CONTINUING EDUCATION & COMMUNITY SERVICES

Dr. Laird Hartman, Dean

Weber State University Continuing Education and Community Services offers courses, seminars, workshops and conferences each year, working closely with the university's academic departments and colleges; with local and state government agencies; and with professional, trade, and special interest associations. These learning partnerships are conducted in the most convenient format for their purposes: classroom lectures, laboratories, workplace practica, online delivery, or by mail. These learning experiences range from academic degree programs and courses delivered in cooperation with the university's academic departments to customized noncredit courses that draw on community resources.

Continuing Education serves the mission of Weber State University through learning partnerships with non-traditional constituencies. Continuing Education facilitates delivery of learning experiences in a variety of alternative formats, at convenient times and places, with appropriate student support services that meet the needs of its diverse clientele.

A network of collaborative working relationships reaches pre-college students; working, re-entering and older adult learners; business and industry; governmental agencies; non-profit groups; public education organizations; and professional associations. Continuing Education addresses regional and national needs for education and professional development.

Student convenience determines the locations for continuing education classes, training and conferences. Classes are taught on the main campus in Ogden after 4:30 p.m.; at the WSU-Davis Campus in Layton; WSU-North Center in Pleasant View; WSU-West Center in Roy; WSU-Morgan Center in Morgan and at public high schools throughout Weber, Davis and Morgan counties. Distance learning offers independent study and online classes to serve students in remote areas and those who prefer to work at their own pace.

CONTINUING EDUCATION ADMINISTRATIVE SUPPORT
Director: Clayton Anderson, 801-626-7310

Continuing Education Administrative Support staff provide information systems/technical support, financial services, employee support services, and facilities support for continuing education courses, conferences, and workshops.

CONTINUING EDUCATION PROGRAM DEVELOPMENT
Director: Peg Werry, 801-626-6990

The Program Development team focuses on maintaining clear relationships with academic units and key client groups, leading to the strategic development of continuing education programs and activities. Professional staff are assigned as liaisons to each academic college at WSU and to major external groups.

CONTINUING EDUCATION STUDENT SUPPORT AND PROGRAM MANAGEMENT
Director: Brian Stecklein, 801-626-6787

Student Support and Program Management provide support for all classes offered through Continuing Education. They work closely with Program Development staff to provide the best service possible to students, faculty, staff, and outside organizations. Learning experiences for students are facilitated through registration, fee payment, basic advising, orientation, logistics, and other forms of support. This group also manages three off-campus centers for Weber State University.

WSU-North Center
1590 West Park Circle
Pleasant View, Utah
801-626-6785

WSU-West Center
5627 South 3500 West
Roy, Utah
801-985-1491

WSU-Morgan Center
241 East young St.
Morgan, Utah
801-829-3136

This group also manages three off-campus centers for Weber State University.

For the latest information and updates, see weber.edu/ce/
Programs for High School Students

Concurrent Enrollment
Weber State University academic departments approve qualifications and curriculum of teachers at high school or applied technology centers. Students in these classes can earn high school and college credits at the same time. Concurrent Enrollment credits/grades become part of the student's permanent WSU transcript.

Early College Program
Early College allows students to fulfill both high school and university graduation requirements at the same time by attending classes at the university while they are still in high school. University faculty teach classes, and the credits/grades from the Early College program become part of the student's permanent WSU transcript. Students are responsible for the university tuition and fees, and Utah colleges and most out-of-state and private universities will accept Early College credits.

For updated information about these programs, see [www.weber.edu/ce/earlyaccess.asp](http://www.weber.edu/ce/earlyaccess.asp).

Credit Programs

Off-Campus, Evening & Weekend Classes
After 4:30 p.m. and on weekends, classes may be taken on campus or at a number of convenient Northern Utah locations. WSU students can pursue bachelor and associate of science degrees through evening and off-campus credit programs facilitated by WSU Continuing Education. Sites have included the WSU-Ogden Campus, WSU-Davis Campus in Layton, WSU-North Center in Pleasant View, WSU-West Center in Roy, WSU- Morgan Center, and Davis High School, as well as through articulation agreements with the Davis Applied Technology College, Utah Valley State College, and Salt Lake Community College. Degree programs in the health professions are offered by special arrangement with selected health care facilities in Utah and surrounding states.

For more information about these courses, see [weber.edu/ce/ce Evening.asp](http://weber.edu/ce/ce Evening.asp).

WSU Online
WSU Online, Weber State University's virtual campus, offers classes that conform to the academic calendar but can be attended anytime and anywhere via the internet. Several degree programs and courses to meet general education requirements are offered via WSU Online. Go to [wsuonline.weber.edu](http://wsuonline.weber.edu).

Independent Study Courses
Independent Study offers courses from a wide range of academic disciplines for students who cannot attend regularly scheduled classes. This allows students to complete course work at home (or anywhere) at their own convenience, beginning at any time during the year and having six months to complete a course. A few bachelor-degree completion programs in the health professions are available in this format. Learn more about the independent study programs at [weber.edu/ce/dl.asp](http://weber.edu/ce/dl.asp).

Travel Study/Study Abroad
Students who have experienced living and learning on the social and educational terms of another culture will be broadened in ways impossible to achieve on an American campus. International travel experiences have been shown to improve the student's performance in the classroom. For more information see [weber.edu/international](http://weber.edu/international).

Professional and Non-Credit Opportunities

Conference, Seminars and Workshops
The CE Conference staff plans and facilitates seminars, workshops and conferences for business, government, public school, higher education and community organizations. For updated information about these events, see [weber.edu/ce/conferences.asp](http://weber.edu/ce/conferences.asp).

Contract Training Programs
WSU extends the resources of the University to the community to achieve specific performance goals for individual businesses. Continuing Education staff connects organizations and individuals with comprehensive training programs to improve performance, increase productivity, decrease costs and get bottom-line results. See [weber.edu/ce/pd.asp](http://weber.edu/ce/pd.asp).

Certificate Programs
Weber State University partners with the Educational Society for Resource Management (APICS), and the American Society for Quality (ASQ) to deliver preparation courses for certification examinations. Courses, which may carry college credit, are designed for individuals who wish to receive professional recognition or expand their skills in these fields. In addition to traditional classroom delivery, both programs are delivered online. See [weber.edu/ce/pd.asp](http://weber.edu/ce/pd.asp).

Utah Law Enforcement Academy
WSU Continuing Education is a sanctioned provider of the Utah Law Enforcement Academy, the basic training program for certification of law enforcement officers. The academy is divided into two modules. The first, or core, provides training required for certification of reserve, corrections or special function officers. The second module continues with training for certification of an officer with full police powers (police, deputy sheriff, Utah Highway Patrol, etc.). Two sessions per year are offered at WSU starting in June and January each year. Classes meet Monday through Thursday, from 6:00 p.m. to 10:00 p.m., and Saturday from 8:00 a.m. to 12:00 p.m. For information about the program, see [weber.edu/ce/policeacademy.asp](http://weber.edu/ce/policeacademy.asp).

International Programs
Students from around the globe attend WSU from one week to an entire semester to study the culture, language, and administrative practice of America. WSU Continuing Education presents a variety of academic, cultural and United States travel experiences for international students through contracts with corporations and educational institutions in other countries. For more information about these programs, see [weber.edu/ce/international.asp](http://weber.edu/ce/international.asp).
### Applied Technology Education Programs

**Director:** Julie Snowball 801-626-7432

Applied technical education includes programs that focus on job preparation. These programs prepare students with a technical skill, license, certificate, or associate's degree upon completion of the program. Applied Technology Education programs are listed below. The type of degree and the specific requirements for each program are outlined in departmental listings.

#### Applied Science & Technology
- Applied Technology
- Automotive Service Technology
- Business Systems Technologies
- Computer & Electronics Engineering Technology
  - CET Emphasis
  - EET Emphasis
- Computer and Design Graphics Technology
- Computer Science
- Construction Management Technology
- Interior Design Technology
- Manufacturing Engineering Technology
- Mechanical Engineering Technology
- Sales & Merchandising
- Telecommunications

#### Business and Economics
- Information Systems and Technologies

#### Education
- Early Childhood

#### Health Professions
- Clinical Laboratory Technician
- Dental Hygiene
- Emergency Care & Rescue (Paramedic)
- Emergency Medical Tech (EMT-1)
- Health Information Technology
- Registered Nursing
- Practical Nursing
- Diagnostic Medical Sonography
- Nuclear Medicine
- Radiation Therapy
- Radiography
- Respiratory Therapy

#### Science
- Biotechnician
- Chemical Technician

#### Social & Behavioral Sciences
- Criminal Justice
- Archaeological Technician
